

famapak

Famapak was established in 1983 in Cyprus, with a core business area in the packaging industry.

Our team consists of experienced individuals whose purpose is to advise the best possible solution to custom fit your needs.

There is a long list of clients that use our machinery and other products and we are confident they are the best reference when it comes to quality of product and excellence of service.

Famapak enjoys today a pioneer position in the Cypriot packaging industry. Our R&D department follows and studies innovation daily so that we may recommend the latest trends and most efficient equipment.

In this catalogue you may find a sample list of machinery and materials we can provide. If there is something you cannot find here, rest assure that we may offer and supply it through our extensive network of associates.

Famapak is proud to be an official agent of Borealis, one of the biggest producers and global supplier of base chemicals, polyolefin products and fertilizers.

With headquarters in Vienna, Austria, Borealis currently employs around 6,600 people and operates in over 120 countries.

Borealis produces a wide range of base chemicals such as melamine, phenol, acetone, ethylene and propylene for use in numerous and diverse industries. In addition, Borealis produces polyolefin products which form the basis of many valuable plastics applications that are an intrinsic part of our daily lives. They can be used in Energy, in the Automotive industry, in Consumer Products and Pipes. Borealis is also one of the leading fertilizer producers in Europe, thus helping make farming more efficient to feed more people and livestock. Borealis supplies over five million tonnes of fertilizers and technical nitrogen products each year.
